THE INTERNATIONAL TIME RECORDING CO.

The International Time Recording Company, which is estimated to control 85 per cent of the time recording business of the world, has just declared an initial dividend of 1 per cent on the common stock. This is considered a very conservative move inasmuch as the earnings for the past year on the common stock were above 20 per cent, and it is estimated that the earnings for the year 1910 will show more than 30 per cent on this stock. There has lately been an active demand for the stock and at the present time there is very little common in the market. The preferred stock declared its thirty-fifth consecutive dividend at the rate of 7 per cent per annum.

GATHERING OF GUM

Maine Yields One-Half of the Total Production.

Only Five Tons of the Genuine 'Commodity Are Consumed Annually in This Country—Balance Is Exported.

Bangor, Me.—The woods of Maine yield more than one-half of the five tons of genuine spruce chewing gum consumed in this country every year. Though the city factories turn out large quantities of artificial gum, made from bitumen, pitch and paraffin and flavored with many beguiling essences, and sell their products so cheaply that the poorer citizen can afford to buy all the gum he wants to chew, the clean, amber-tinted tree blood of the black spruce tree is getting to be an expensive luxury.

Before the pulp mills came to Maine crystal pure gum was sold by the jobbers for 1 1/2 to 20 cents a pound. Most of it was collected from newly chopped trees by the lumbermen. The demand for the gum has increased in the past few years, giving birth to a new industry which gives profitable employment to more than 200 men for a month in every year. It has taken about 20 years to complete the evolution of gum picking from a crude art to a science.

The men who engage in the business have regular routes, which they travel for year after year. The territory is leased from the land owners. Before coming down from a tree the hunter makes deep horizontal scratches on the sunny side of the trunk, forming wounds from which pitch will exude during the summer and later harden into gum for the next harvest.

Little gum of last season's ripening has come to market, and the retail price in Bangor is 15 cents an ounce. In April, when the pickers come in with their packs, the price will fall to 10 to 12 cents, and about \$1.50 in ten-pound lots.

Persons who visit the backwoods towns of Maine hear many stories about enterprising citizens who have gained sudden wealth by cornering the gum supply. In 1886 a Boston druggist named Brown came to Bangor to purchase lumber for a group of cottages he was about to erect near Cottage City. He sold spruce gum in his store, buying it from the jobbers at an average rate of \$1 a pound. Finding that he could buy it in Bangor for 50 cents a pound, he purchased all he could get, visiting the camps in order to secure as much as possible.

He bought nearly two tons, which he packed in boxes and stored away to await the opening of the river so that it could be taken to Boston by boat. The ice was late in going out of the Penobscot that year, and before the druggist received his gum the price had gone up to \$2 a pound. He made a profit of more than \$5,000 on an investment of less than \$2,000.

New Rigid Airship.
Paris.—An engineer named Spies has offered the French government a dirigible balloon of the rigid type, his own invention, with a capacity of 7,000 cubic metres. It is now on exhibition here.

His Mother Was a Lady.
Was Shakespeare's mother's family one "associated with gentility"? Mrs. Charlotte Stopes has been minutely examining the Stratford records, and thinks she has discovered deeds which answer that question in the affirmative and which show that Halliwell-Phillips was not sufficiently thoroughgoing in his examinations and conclusions. Her gleanings are but scanty, and do not mean much, save possibly in the implication that Mary Arden's family was one in which education was valued and books were available.

Poor Service Under State Control.
In Italy the results of the state railroad operation are thus far notorious. The operation results, of course, in an annual deficit, and although the traffic constantly increases, the receipts constantly diminish. During a recent month's operation, out of 1,000 passenger trains 486 were an hour or more late, and there was constant and bitter complaint both from shippers and passengers as to the unsatisfactory character of the service.

Rats Give Alarm.
Coming over on an ocean liner an old lady complained to the captain that she had seen a rat in her stateroom. "Keep it there, madam," said the captain. "Why do you like rats?" asked the old lady. "Well, madam, I've got a rat in my cabin," was the answer, "and, though I'm not superstitious, when the rats leave the ship, I do."

Victory Over Tuberculosis.
That the war on tuberculosis pays immediate dividends in human life is proved by a report of Dr. Bosley, health commissioner of Baltimore, in the monthly health bulletin for July it is shown that the number of deaths from tuberculosis occurring in the city was 92, as compared with 123 for the same month last year.

Needs No Press Agent.
If some poor cuss should discover a product like petroleum butter the newspapers of the country would charge him \$2 a line to advertise it. It's different in John D.'s case.—Milwaukee Journal.

America's Large Cities.
In this country there 155 cities with populations exceeding 50,000. Of these 15 have over 300,000 inhabitants, 27 have between 100,000 and 300,000, 48 have between 50,000 and 100,000, and 45 have less than 50,000.
